

ALWAYS AWAKE. ALWAYS ON GUARD.

External Security Options for Fast-Moving Property Listings

LotGuard's external mobile surveillance solutions are designed to meet the demands of fast-moving properties where security needs can shift quickly and flexibility is essential. From temporary sites and rapidly changing developments to transitional or high-turnover environments, these solutions provide a visible security presence without the delays or limitations of permanent infrastructure. By combining rapid deployment, remote monitoring, and scalable coverage, LotGuard helps properties maintain security, deter incidents, and adapt as operational needs evolve.

On the next page, the table compares our external mobile surveillance solutions by key features, deployment suitability, coverage, and recommended use cases.

ALWAYS AWAKE. ALWAYS ON GUARD.

Temporary Mobile Surveillance:

External Mobile Security System Option	Description / Features
LotGuard PRO	• Solar-powered Surveillance Trailer standing up to 20-ft tall • Fitted with AI analytics and near-360° PTZ (Pan-Tilt-Zoom) night vision cameras • Constantly monitors exterior areas across properties for unusual activity in real-time • Remote monitoring through Interactive Surveillance Operations Centers (ISOCs) flags suspicious behavior before damage occurs via 4G/5G networks
LotGuard MULTI	• Covers multiple zones using 4 HD, PTZ cameras • Specifically designed for commercial parking lots and large commercial listings • Equipped with AI-video analytics, 4G/5G connectivity, and 24/7 remote monitoring • Timestamps every incident for later review
LotGuard MINI	• Compact 4-camera security system with near-360° visibility and 23X optical zoom • Delivers AI detection and remote monitoring to deter crime as it unfolds • Mounts onto existing poles and structures with ease • Ideal for hard-to-reach spots across a property's exterior (e.g., alleyways, perimeters)
